

AG DATA science camp

presented by  **OLDS COLLEGE**
OF AGRICULTURE & TECHNOLOGY

Explore how data and technology can help transform the future of agriculture.

**July 31 -
August 4,
2023**

Discover how you can build a more sustainable future by harnessing the power of data-informed decision making.

Ag Data Science Camp is a five-day overnight camp offered free of charge to approved high school students in grades 11 and 12 interested in transforming the future of agriculture through data science and technology.

Five Day Overnight Camp

Experience life as a college student living in residence at Centennial Village. Explore what the campus has to offer, including the Olds College Smart Farm, Botanical Gardens and Constructed Wetlands.

Presented by Olds College of Agriculture & Technology, the camp exposes you to career paths in the emerging fields of precision agriculture, data science and agriculture technology.

Guided by instructors from the Werklund School of Agriculture Technology at Olds College, you'll be exposed to the principles of data literacy, informed decision making and emerging agriculture technologies.

Over the course of the week, you'll take part in engaging classroom discussions, demonstrations, guest lecturers and produce a final project demonstrating your new data informed decision making skills to solve an existing agricultural challenge in front of a panel of industry professionals.

AgSmart 2023

As part of your camp curriculum, you get to enjoy two afternoons exploring AgSmart 2023, an outdoor educational agriculture expo featuring live equipment and technology demonstrations, educational sessions and exhibits discussing emerging trends in the agriculture industry.
